| 5. Training Catalog | 12. Management report |
| 6. Assigning trainings | 13. Knowledge Hub |
| 7. Starting, editing & deleting trainings | 14. Your own trainings |
| | 15. FAQ |

1. Your role

As a **Reporting Manager** you:

- add, update and remove trainings for your reportees,
- review their progress on the dashboard,
- approve completed trainings (or send them back with remarks). **A training only counts as complete once you approve it.**

Every training must have a **training material link** before it's assigned. Your reportees see it while they work, and it's required before they can ask for approval.

2. Getting started

1. HR adds you to Skillgo and you get an email: "**You've been invited**". Click **Accept invitation**, click it again on the Skillgo page, then set your password.
2. From then on, open **<https://tni-webapp.vercel.app>**, choose **Reporting Manager** under **Sign in as**, and sign in with your email and password.

Forgot your password? Click **Forgot your password?** on the sign-in screen.

3. Your screen

MENU ITEM	WHAT IT'S FOR
Dashboard	Team progress, charts, individual cards, year-wise summary, export
Approvals	Completion requests waiting for you (the badge shows how many)
My Trainings	Only shown if you report to a senior manager; see section 14
Training Catalog	The company list of trainings you assign from
Knowledge Hub	Approved learnings from your team
Reminders	Who is due a nudge; send reminder emails (the badge shows overdue trainings)
Team & Settings	Add and manage reportees, year-end tools
User Guide	Opens this guide

The current financial year is shown at the top of the menu (for example **FY 2026-27**).

4. Adding your team

Go to **Team & Settings**.

One reportee

1. Click **Add Reportee**, enter their full name and o2h email, and pick a colour.
2. Choose how they get their login:
 - **Send invite email**: they get an email with a link and set their own password.
 - **Temporary password**: no email is sent. Skillgo shows their email and a temporary password for you to share on Teams or Outlook. They must choose their own password after signing in.
3. Click **Add & send invite** or **Add & create password**. Use **Copy message to send** to copy a ready-written message with their login details.

If the email can't be sent

Skillgo shows *"Account ready — but the email couldn't be sent"* with a one-time link. Click **Copy** and send it to the person on Teams or Outlook.

Many reportees at once (Bulk Add)

1. Click **Bulk Add**, then **Template** to download the Excel template (columns: **Full Name**, **Email**).
2. Fill in one person per row, save, and upload the file.
3. Skillgo checks every row and marks problems (missing name, invalid email, duplicates, people who are already users). Rows with errors are skipped.
4. Choose **Send invite email** or **Temporary password**, then click **Add N reportees**. Each row then shows *"Invite emailed"* or *"Added — share link"*. If any emails couldn't be sent, click **Copy**

links to copy all their invite links at once.

Managing reportees

ACTION	WHAT IT DOES
	They haven't set their password yet
Login access	Three ways to get someone signed in: Email a setup link , Copy a setup link (no email, you share it on Teams) or Set a temporary password (no email, you share their email and password). Use it when an invite didn't arrive, expired, or they forgot their password. A new link or password replaces the old one.
Deactivate / Reactivate	Blocks or restores their sign-in (you're asked to confirm). Their trainings and history are kept.
Delete (bin icon)	Permanently removes the person and all their trainings, notes and approval history. This can't be undone. Use Deactivate if you only want to block access.

To move someone to another manager or change their role, ask HR. They can do it from the Users page.

5. Training Catalog

The catalog is the shared, company-wide list of trainings. Set a training up once here, then assign it to anyone, singly or in bulk.

Adding a training

1. Click **Add Training**.
2. Fill in **Training Name**, **Training Category** (group, then category), **Training Mode** and **Training Priority**. For Face to Face trainings, also enter the **Trainer**. **Training Details**, extra reference links and **Parts / Modules** are optional.
3. The **Training Material Link** can be left empty in the catalog, but it must be filled in before the training is assigned.
4. Optionally tick people under **Assign to**: they get the training straight away, as "Not started", without dates.
5. Click **Add to catalog** (or **Add & assign to N**).

Bulk import from company sheets

Click **Bulk Import** and upload one of o2h's training sheets exactly as it is:

- **New Joiner 6 Months Training Plan**: topics, details, trainer and method are read, and the category is matched from the section (Human Resource, BA, Quality Assurance, Information Technology).
- **TNI plan**: category, method, priority (A+, A, B+, B) and any link in Detail/Comment are read.
- Any simple sheet with a **Training Name** column also works.

Every tab in the workbook is read. In the preview, check each training's category (you can change it from the dropdown) and untick anything you don't want.

Assigning while importing: if the sheet names the person it's for (the *Name* cell on New Joiner and TNI sheets), Skillgo pre-selects them under **Assign these trainings to**. You can change the selection. Click **Import & assign** and every ticked training is added to the catalog and assigned to those people as "Not started". Trainings already in the catalog are just assigned, and trainings without a material link are only added to the catalog. Personal columns such as Status, Completion Date and signatures are ignored.

Using Google Sheets?

Go to File → Download → Microsoft Excel (.xlsx), then upload that file. PDFs can't be read.

Editing and deleting

- Click the pencil icon to edit a catalog training.
- Click the bin icon to delete one, or tick several (or **Select all**) and click **Delete N selected**.
- Deleting from the catalog doesn't remove trainings already assigned to people.

6. Assigning trainings

One training to one or more reportees

1. On the Dashboard click **Assign Training**, or click **Assign** next to a training in the catalog.
2. Under **From Training Catalog**, pick a training, and its details fill in automatically. Or choose **+ New training** and fill in the fields yourself. Tick *"Also save this training to the Training Catalog"* to reuse it later.
3. Optionally set an **Expected End Date** and a **Due Date**. The due date drives overdue flags and reminders. Dates can also be left empty and set when the training is started.
4. Tick the reportees (or **Select all**) and click **Assign Training**.

Many trainings to many reportees (Bulk Assign)

1. Click **Bulk Assign** on the Dashboard, or tick trainings in the catalog and click **Assign N selected**.
2. Pick the trainings and the reportees, and set the dates. If a chosen catalog training has no material link, Skillgo asks for one here and saves it to the catalog too.
3. Click **Create N assignments**.

After assigning, **each reportee gets one email** listing their new trainings. A message at the bottom right confirms whether the emails went out. The training is assigned even if an email fails.

Links are checked

Material, reference and part links must be real web addresses (for example <https://...> or <docs.google.com/...>). Free text in a link box shows *"Enter a valid link"* and blocks saving.

7. Starting, editing and deleting assigned trainings

- **Initiate:** a reportee normally starts a training themselves and picks its start and end dates. You can also do it for them: open a "Not started" training and click **Initiate**, choose the **Start date** and **End date**, and it moves to In Progress.
- **Edit:** open a training (from a reportee's card → **View all**, or any list) and click **Edit** to change the name, category, link, mode, trainer, priority or dates. Parts can't be changed once a training is assigned. To change them, delete the training and assign it again.
- **Delete:** click **Delete** in the training details, or the bin icon next to a training in a reportee's list (Dashboard → a reportee's card → **View all**). This removes it together with any notes and approvals, so use it for trainings added by mistake or for demo purposes.

Only you (their reporting manager) and HR can delete a reportee's training. Reportees can't, not even for trainings they assigned to themselves.

8. Approvals

When a reportee marks a training (or a part) as done, it appears under **Approvals** with their notes and outcome links.

- **Approve:** marks it complete and adds it to the Knowledge Hub. You can add optional remarks, which the reportee sees.
- **Send Back:** returns it for changes. Remarks are required so the reportee knows what to fix. They correct it and resubmit.

Multi-part trainings are approved part by part. The training is complete when every part is approved.

9. Dashboard

Top cards

Team Members, **Training Units** (a multi-part training counts as one unit per part), **Completion** (percentage of units approved) and **Overdue**. Click any card to see the list behind it.

Progress trends

Switch between **Weekly** (last 12 weeks) and **Monthly** (months of the selected FY):

- **Training activity:** units assigned, submitted for approval and completed in each period. Hover over the chart to see the numbers for a date.
- **Active learners:** how many of your reportees submitted a training in each period. Use it to see whether people are actually doing their trainings.
- **Where trainings stand:** how many trainings are not started, in progress, awaiting approval, sent back, completed or overdue.
- **Completion by category:** the share of assigned units completed in each training category.

Every chart has a **Table** link that shows the same numbers as a table.

People

Each reportee has a card with their completion %, units done, pending and overdue counts, and an achievement badge:

BADGE	MEANING
Star Performer	100% of their units completed. They also appear in the Star Performers banner.
On Track	70% or more completed and nothing overdue
In Progress	Working through their trainings
Needs Attention	One or more trainings overdue

The **Year-wise Summary** table at the bottom shows each person's completed/total units for every FY, which is useful for appraisals. Click **Refresh** to load the latest data.

10. Reminders

1. Set how often to nudge people: every X days while a training is pending, and more often once it's overdue. Click **Save Settings**.
2. The **reminder(s) due now** panel lists who is due a nudge. Click **Send & Mark Reminded** to open a ready-written email in your mail app, or **Copy** to paste the text into Teams.

Reminders are not sent automatically. They go out when you click the button.

11. Year-end tools

At the end of the financial year, go to **Team & Settings → Year-End Tools**. Every unfinished training for the current FY is listed. For each one choose:

- **↶ Carry to FY [next year]**: the training moves to the new year, including its parts.
- **Discard**: it's archived and still visible when you look at the old FY.

Then click **Finalize FY ... → Start FY ...**. New assignments go into the new year from then on.

12. Management report

Click **Export** on the Dashboard, tick one or more FYs, and download an Excel file with three sheets: **Team Summary** (completion % and achievement per person), **Training Details** (every training and part with status and dates) and **Learnings & Notes** (approved notes and outcome links).

13. Knowledge Hub

A searchable library of your team's approved trainings, with notes and links. Search by training name or note text, and filter by FY.

14. Your own trainings

If you report to a senior manager, HR sets that up, and **My Trainings** then appears in your menu. There you work through your own trainings like any reportee: **Start**, **Mark as Done**, and **Assign to myself** to pick catalog trainings. Your senior manager approves them. You can also choose **Reportee** on the sign-in screen to go straight to My Trainings.

You can't assign, edit, delete or approve your own trainings. Only your senior manager (or HR) can.

15. Frequently asked questions

A reportee didn't get their invite.

Ask them to check Junk / Other. Then click **Login access**. If email still doesn't arrive, copy the link Skillgo shows and send it on Teams.

A reportee assigned a training to themselves. Do I need to do anything?

No. You get an email telling you what they picked. It shows a **Self-assigned** tag and you approve it as usual. If it isn't relevant, you can delete it.

Can I change a training's parts after assigning it?

No. Delete it and assign it again with the right parts.

Someone is moving to another team.

Ask HR to change their reporting manager on the Users page. Their trainings move with them.

I discarded a training by mistake at year-end.

Discarded trainings are archived, not deleted. Assign the training again from the catalog.
